ABOUT US

Itipack Systems is a world leader in integrated strapping solutions. Each one of our systems shares in our firm commitment to high value, optimum performance, and long-lasting results.

SOLID UNDERSTANDING

As experts in the strapping machine industry, we understand that your business needs are unique. That is why we design and build strapping machines for canned products that are customized to suit your needs. We work to ensure that our machines offer you the maximum output and productivity.

TYPES OF MACHINES

VKE/FLPS

Automatic strapping machine to strap pallets of empty cans. Equipped with a sealing head, top mounted and a lance for the introduction of a strap through the pallet void, with a stabilizing and compressing plate up to 500 kg.

VKB/FLPS

Automatic strapping machine to strap pallets of empty cans. Equipped with a lance for the introduction of a strap through the pallet void, side-mounted head applying double strap tensioning, and top stabilizing compression plate up to 500 kg.

CAN MACHINE FEATURES

We recognize that not all can products are the same and offer several customizations for our strapping machines.

STRAPPING HEAD

Single or dual-headed side seal strapping head.
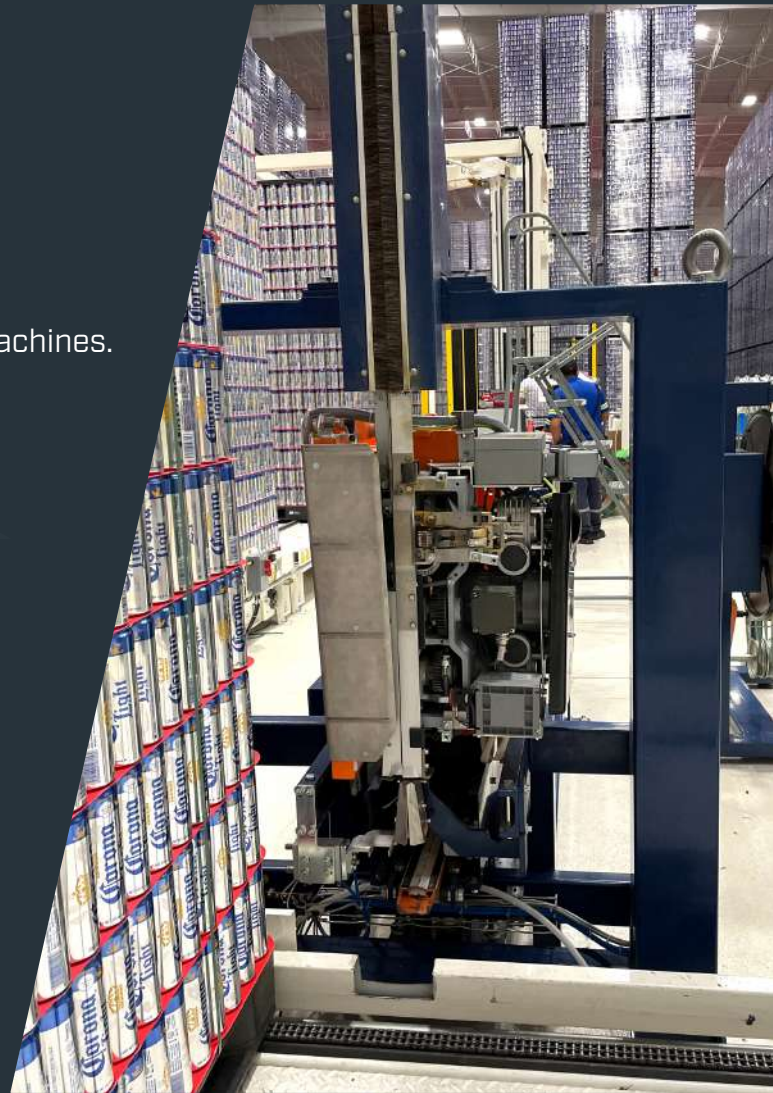

COMPRESSION

We offer fully-selectable side compression.

INTEGRATION

Optional line integration of multiple automatic machines.

BUILT-TO-SUIT

Fully-customizable bayonets for pallet voids.

ADVANCED
EFFICIENCY

ADVANTAGES OF WORKING WITH US

01 ——— COMPLEX PROBLEM
SOLVING

02 ——— RESPONSIVE SERVICE

03 ——— SAFE WORK
ENVIRONMENTS

04 ——— CREATING EFFICIENCY

Fully customized designed for long-life performance

Stabilizing platen up to 500 kg compression

Single / double-headed machine

Easy-to-access side strapping head

Possibility of an integrated lifting
system for cross strapping

STRAPPING MACHINE FOR CANS

Single / double-headed machine without
compression for cross strapping machine for cans
