DOWN WITH DOWNTIME.

To avoid costly downtime, it is extremely important to have a diligent and proactive approach to preventative maintenance.

Our service support team is a trusted resource for all customer service needs. We tailor a service program to your specific needs using a comprehensive approach.

An integral part of equipment performance, maintenance should both be scheduled and performed at appropriate intervals.

Itipack does this with a trusted network of service professionals spread throughout North America & Mexico. A proactive approach to maintenance would help ensure your automatic strapping system will not fall prey to unexpected down-time.

SECOND TO NONE SERVICE

We aim for timely response to all service inquiries & quick dispatch of service techs on customer request.

QUICK HEAD REBUILD
PICKUP IN ONE WEEK

TURNAROUND OF 6
WEEKS FOR REBUILDS

PREVENTATIVE MAINTENANCE
30-POINT CHECKLIST

REVIEWS

from our clients

Brian Koziarski

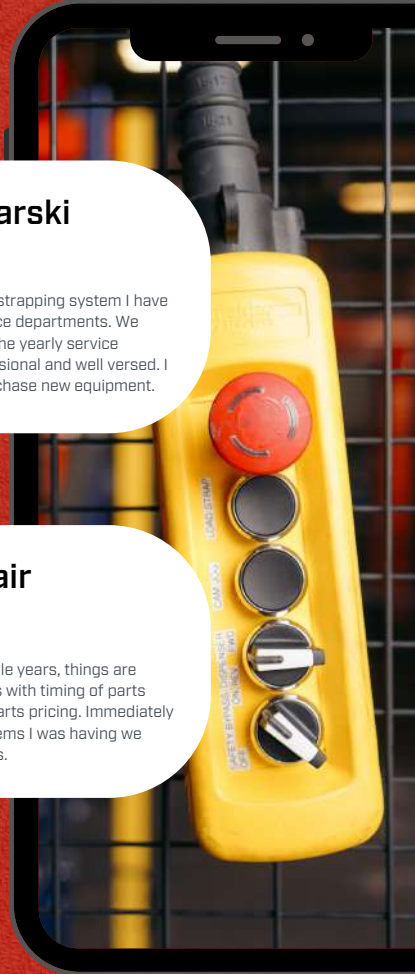

Over the past several years I have been using Itipack strapping system I have been quite satisfied with both their support and service departments. We have installed 5 units in our facility and have utilized the yearly service agreements with great success. The techs are professional and well versed. I would rate Itipack highly when the time comes to purchase new equipment.

Nick Sinclair

After working with Itipack over the course of a couple years, things are doing well. Before I worked with Itipack, I had issues with timing of parts delivery, and I also expressed some concern over parts pricing. Immediately after meeting with Itipack and discussing the problems I was having we were able to work together and resolve these issues.
